

Just Keys Tools & Parts (1)

Kawai Model No. CE-7, Serial No. K1129886

Copyright © 2019 by Cris Forster

Old drilling and clamping jigs (no longer used).

Parts and materials for making and installing color-coded key labels with ratios.

Labels consist of three parts: (1) Formica base.

(2) Colored labels with ratio numbers.

(3) Clear Lexan shield with custom industrial scratch-resistant coating.

Lexan adhesive: Airless mixing syringe for Devcon 2-ton clear epoxy cartridge #14260.

Leveling adhesive for key labels (not in box):

For white keys: Momentive RTV102-12C RTV Silicone Adhesive Sealant, White. (Formerly made by GE.)

For black keys: Momentive RTV103-12C RTV Silicone Adhesive Sealant, Black. (Formerly made by GE.)

Just Keys (5)

Kawai Model No. CE-7, Serial No. K1129886

Röslau piano music wire.

Just Keys (6)

Kawai Model No. CE-7, Serial No. K1129886

The Just Keys tool box contains many standard and a few specialized piano tools. In the tool box from left to right: action and keyboard regulation pliers, a grand piano hammer removing pliers, a tuning hammer extension, and a rosewood-handle tuning hammer. Below from left to right: a brown corduroy tool roll filled with action regulation tools, a center pin case and center pin tool, a piano hammer voicing tool, and a collection of stringing tools. To avoid clutter, numerous small and large tools — including felt and rubber tuning mutes — do not appear in this photo.
